Page 1/6

Statistics and Configuration

- Statistics about the user's collection
- Proxy configuration and user's login and password

Unachieved features

- The search engine
- The web service
- The synchronization

Reinforcing the software

- Working with an other student's software
- Understanding what they have done
- Theirs architecture & code

Laying the foundation

- Merge the two softwares in an only one
- Set the new database
- Check and update queries
- New tools : Lucene and H2

Web Service and Synchronization

- Connecting to the website
- Synchronizing the libraries
- Prepared by previous students
- But not implemented

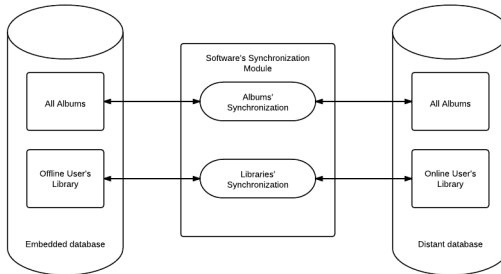

Web Service

- Provide a list of fonctionnalités
- Layer between the server and the client

Synchronization

- Keeping both library up to date
- Automatically resolve differences
- Report unsolvable conflicts

To be continued...

- Web service and synchronization finished
- But the project is not
- Submit an album
- A more user friendly interface

Thanks for your attention.

If you have some question before the demonstration, we would be pleased to answer them.
